

Udugundla Shiva

Aspiring Software Developer | Skilled in Python, SQL & Manual Testing

hyderabad,telangana 8688247393 shivaudugundla73@gmail.com

Profiles	Shiva-7393 Udugundla Shiva	
Summary	B.Tech student with a strong foundation in programming and web technologies, skilled in HTML, CSS, JavaScript, C++, Python, and SQL. Hands-on experience in UI/UX design using Figma and manual testing. Eager to apply technical knowledge and problem-solving skills to real-world projects while contributing to innovative solutions in a growth-oriented organization.	
Education	NIAT(Nxtwave Institute of Advance Technologies) Hyderabad,telangana https://www.niatindia.com/	August 2024- present B.Tech
Projects	Prime Video Web Application Worked on a Prime Video clone web application and prepared a detailed test case report using Google Sheets. Designed and executed 15+ test cases covering both positive and negative scenarios, focusing on functional, UI, and responsive testing. Identified bugs such as carousel failure, incorrect background colors, spelling errors, and overlapping thumbnails. Documented each test case with steps, expected vs. actual results, severity, priority, and screenshots to simulate real-world QA practices. https://docs.google.com/spreadsheets/d/1Xq6oF_giVEfTASngi4TboOsQ9xYyNvDefxCgFi... “Enthusiastic and detail-oriented fresher with skills in Manual Testing, UI/UX testing, and writing structured test cases. Experienced in identifying and reporting defects using test documentation techniques.”	August 2025 - August 2025
	Manual Testing Report of Juice Shop Web Application The Manual Testing Report of Juice Shop Web Application is created to evaluate the functionality, usability, and reliability of the application through systematic and thorough manual testing. OWASP Juice Shop is an intentionally insecure web application designed for security and functional testing practice. This project focuses on identifying defects, UI issues, functional bugs, and usability problems by executing predefined test cases without the use of automated tools. https://docs.google.com/spreadsheets/d/102dYhTIgAnQTPnBp6C10oSgKss76Iay5yGz9...	august 2025- august 2025
	NxtWatch Video Streaming Web Application The NxtWatch Video Streaming Web Application is a platform where users can watch videos, search for content, and explore different categories. The application allows users to log in, play videos, save favorites, and toggle between light and dark themes. The purpose of this project is to perform manual testing to identify functional bugs, UI issues, and usability problems. The testing ensures that all features work correctly, the interface is user-friendly, and the application meets the expected requirements. https://docs.google.com/spreadsheets/d/1XHLNfAvrMNQ4MrTRuXwgo5oSSBPRPZ9t9C...	june 2025- july 2025
	Ground Facilities Management System The Ground Facilities Management System is a prototype designed to manage and monitor various ground facilities efficiently. The project focuses on providing a visual representation of how users can access, book, and manage facilities such as sports grounds, seating areas, and other outdoor amenities. This Figma prototype demonstrates the user interface (UI) and user experience (UX) design, showing interactive flows for navigating different sections, viewing facility details, and managing bookings. https://www.figma.com/proto/bmTkkpXwZVQQkwPEx1sqEG/Untitled?node-id=39-64	june 2025- june 2025
	gramasathi I developed Gramsatthi, a community-focused web application built during the Telangana Hackathon using Base44, a no-code AI platform. The platform helps connect rural sellers with buyers by allowing easy product listing, user registration, and direct communication. I focused on creating a simple and responsive interface that supports local businesses and improves accessibility for rural communities. The project was completed and deployed within the hackathon timeframe. https://app--grama-sathi-dd976894.base44.app/login?from_url=https://app--grama-sa...	august 2025
	Drag&Drop TODO A dynamic task management web app that lets users create, organize, and move tasks across multiple workflow stages using drag-and-drop functionality. https://dragdroptodo.niat.tech/	august 2025
	meetup project I designed and automated a complete web testing framework using Selenium WebDriver, Page Object Model (POM), and TestNG/Pytest, covering both UI validation and functional testing for a sample web application consisting of Welcome Page and Registration Page. https://github.com/Shiva-7393/meetup-project.git	oct 2025
	jobby app project Selenium Automation Testing Project – Jobby App Built an automation testing framework using Selenium with Python following the Page Object Model (POM) structure. Automated major test scenarios including login validations, UI checks, header navigation, home page verifications, job search functionality, and profile section testing. Implemented reusable page classes, explicit waits, and assertion-based validations. Tech Stack: Selenium (Python), POM, PyTest/Unittest (if used), WebDriver. https://github.com/Shiva-7393/jobby-app-project.git	nov 12 2025
Skills	Web Technologies Advanced HTML, CSS, PYTHON, JAVASCRIPT Web Frameworks Intermediate Figmaa, UI/UX, manual testing	
Certifications	Telangana Hackathon Nxt Wave http://cdn1.ccbp.in/misc/BFT-participation-NIAT/EJU35C99Y5.png Enthusiastic <u>B.Tech</u> student with strong knowledge in HTML, CSS, JavaScript, SQL, Python, and Manual Testing. Participated in Telangana Hackathon, gaining hands-on experience in problem-solving, teamwork, and innovative project development. Passionate about UI/UX design and quality assurance, eager to contribute to real-world projects.	August 2025
